

Behavioral Contract (Minotaur God Card)

Operation

```
move(Worker worker, Tile to): void
```

Assumptions

- The current **player** has a **MinotaurCard**.
- The opposing **player** has no **GodCard**.

Preconditions

- The **game** is not over.
- The **game** is in the TURN_ACTION phase.
- The **worker** is selected and belongs to the **current player**.
- The **worker** is currently placed on a valid **Tile**.
- The **to Tile** is adjacent to the worker's current **Tile**.
- One of the following must be true:
 - **to** is unoccupied, has no dome, and is at most one level higher than the current tile.
 - **to** is occupied by an enemy **Worker**, and:
 - The **Tile** directly beyond **to** (in the same direction) is a valid **Tile**.
 - That **Tile** is unoccupied.
 - That **Tile** has no dome.
 - **to's Tower** is at most one level higher than the current **Tile** that the enemy **Worker** is on.

Postconditions

- If moving into an empty **Tile**:
 - The **worker** moves to the **to Tile**.
- If moving into an occupied **Tile** (pushing an opponent's worker):
 - The opponent's worker is pushed into the **Tile** directly beyond **to**.
 - The **worker** moves into the **to Tile**.
- The original **Tile** becomes unoccupied.
- If the **worker** moves onto a **Tile** with a **Tower** of height 3 (but not by pushing), the player immediately wins and the game transitions to the **GAME_OVER** phase.
